Message from SAAPhDs President, Dr Siphe Potelwa

Dear Members and Colleagues,

Not just for me, but for all SAAPhDs members, we are extremely grateful to the Almighty, the source of all power and creator of all mankind, for getting us this far. I write to you my message, one of high expectations and hope for better SAAPhDs with amazing potential and equitable chances for all.

We do so with much delight and purposeful humility.

Items of concern that lower our academic standards include the following:

1. Awarding of Honorary Doctorate, bogus Doctors;
2. Awarding of Professorship;
3. Post Doctorates;
4. Jobs for PhDs; and
5. The difference between DrPH (MBCH) and PhD.

Allow me to clarify in depth fifth concern as clearly clarified by number of scholars. Such as Nigeria Association of Public Health report by President Afeez Odegoke, and Minister of Higher Education Dr Blade Nzimande.

The subject of both doctoral programs in philosophy (PhD), public health (DrPH) and traditional surgeons. Both scholars agreed that there are some significant distinctions between these two categories of programs to be specific:

“Scope: DrPH programs are frequently more practice-oriented, preparing students for management positions in the field of public health. They could concentrate on the creation of public health policies and applied research. On the other hand, PhD programs place a greater emphasis on original research and the creation of new knowledge in public health.

Duration: While PhD programs may take longer, sometimes four to five years or more, DrPH programs normally take three to four years to complete.

Curriculum: The curriculum for DrPH degrees is often more organized and has an emphasis on leadership, policy, and applied research courses. On the other hand, PhD programs could offer a more flexible curriculum with a focus on research techniques and statistics.”

Based on the above fact, we should agree that the title of Doctor for medical official to be removed.

Allow me to present what we found as crucial role in national building by PhD holder's:

International Collaboration: PhD holders frequently work worldwide in partnerships and collaborations, contributing global insights. This cooperation may result in cooperative research initiatives, knowledge sharing, and strengthened diplomatic connections, all of which are advantageous to the country.

Policy Development: PhD holders frequently work on policy research and analysis. Their knowledge contributes to the creation of evidence-based regulations in sectors including technology, education, healthcare, and the environment, resulting in more efficient government.

Social Impact: PhD holders can use their research to solve societal challenges. Their work can result in enhancements to social justice, public awareness, and quality of life, whether it is in the domains of public health, social sciences, or environmental studies.

Research and Innovation: Experts in their professions, PhD holders contribute to cutting-edge research and invention. Their efforts result in technical developments, novel understandings, and solutions to challenging issues that can boost economic growth and international competitiveness.

Education: Many PhD holders are employed in academia where they mentor the next scholars and professionals. They provide students with information and critical thinking abilities so they may solve social issues and positively impact the advancement of the country.

Entrepreneurship: PhD holders frequently establish creative companies and enterprises as entrepreneurs. These businesses may strengthen the economy, add jobs, and launch fresh goods or services, encouraging entrepreneurship across the board.

Cultural Preservation: PhD holders aid in the preservation and promotion of the country's cultural legacy in disciplines including history, anthropology, and linguistics. Their efforts guarantee that histories, languages, and customs are transmitted to coming generations.

Allow me to present what PhD holders will not tolerate:

1. Insults to public representatives who possess PhD. Such as Prof Ndletyana, Dr Ndlozi, Dr Ndzimande, Dr Spuhla etc.
2. Insults to Vice Chancellors by politician e.g., Prof LenkaBula from UNISA and Prof Buhlungu from Fort Hare University.
3. Insults to senior academics by academic elites will not be tolerated e.g., Prof Phakeng by Prof Jonathan Jansen.
4. Interference of parents to lecturer hall will not be tolerated e.g., case again Dr Pedro
5. Unemployment of PhD holders.
6. PhD holder's regalia worn to unprofessional ceremonies.

In summary, the shortcut of some politicians and church leaders to have PhDs must come to an end not later. They should work hard and earn it like we all did by producing a thesis.

Sincerely,

Dr Siphe Potelwa

President of the South African Association of PhDs

Report from the Secretary-General, Dr Bongani Nkala

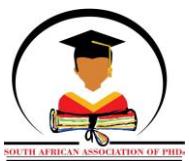

Dear Members and Colleagues,

1. **Background and genesis of the Association**

The Association was founded on Twitter and migrated to WhatsApp. This was in 2020 during the Covid-19 pandemic period. It was founded by Dr S Potelwa, Dr Kula, Dr Majavu, Dr H. Khosa, Prof Modisane and Dr Nkala. It is important to note that the Association was originally founded as to unit black PhD holders with the primary objective to educate, protect and defend NQF 10 level. The founders were not impressed by medical doctors calling them doctors, moreover, they were

concerned about bogus qualifications or bogus institutions offering qualifications that they don't quality to offer which includes hoary doctorate.

For the reason mentioned above, it was clear that we as founder have a role to play in educating, defending, and protecting the imagine of NQF level 10. A clear position was taken in open the group to other PhD holders as to invite them based on who we know and group the group. Our primary engagements then were to hold talks as in virtual webinars, celebrate PhDs that graduated during Covid-19 and hold talks on issues affecting the society. Moreover, to educate about the role

of PhD in our society being in public and private sector. We also thought that it's imperative to take a clear direction about those institutions that are harm the imagine of the organization. The next section will cover membership and history association with it.

2. Membership

The current membership is sitting at over 100 and these are mainly doctors and professors that have been added in the main group since the establishment of the association. As per our policy, a PhD or similar is a requirement for a full membership. It is important to state that during conceptualization, a student membership was introduced, but a couple of students have been admitted in the group. A decision was taken in one of the special general meetings held in 2021/2022 to request members to make payments of R809 as to have full membership as to formalize the Association. It is interesting to note that only 37 out of 100 have made membership fees payment. Due to lack of interest or lack of vision rate for the 63 memberships, a decision was taken to migrate full membership into a new WhatsApp group which is called an **affiliate membership**. Furthermore, a decision was taken that for any doctor to be admitted in the Association they should pay full membership fee before added in the group. The next section will reflect on the key activities embarked on from the launch up to recent.

3. New graduate celebration

In 2020, management team thought that it's important to celebrate those who graduated during covid of which they never enjoyed full official graduate. The first event was held at Dr Kula residence which was on the 28 November 2020. Approximately 20 members attended the event, and only 3 doctors were honored or celebrated. It was Dr Khosa, Dr Nkala and Prof Modisane and the day was made extra special. The theme of the day was on the reflection of people we lost during Covid-19 and the members agreed to wear all black as to honour the lives we lost. Most importantly regalia was worn over. From this event, it was deciding that all black and regalia will be our uniform for our gatherings.

On the 4th December 2021 we celebrated 10 newly graduated doctors. The event was held at Eduvos, Midrand campus. The event blended and over 15 members attended from various provinces. The theme was around GBVF and our role as NQFL level ten. We celebrated the following newly graduated doctors namely: Dr J Modise, Dr S Ndlela, Dr M Moyo, Dr M Mkhwanazi, Rev Dr Twala (late) and Rev Dr V Sonti.

Regards,

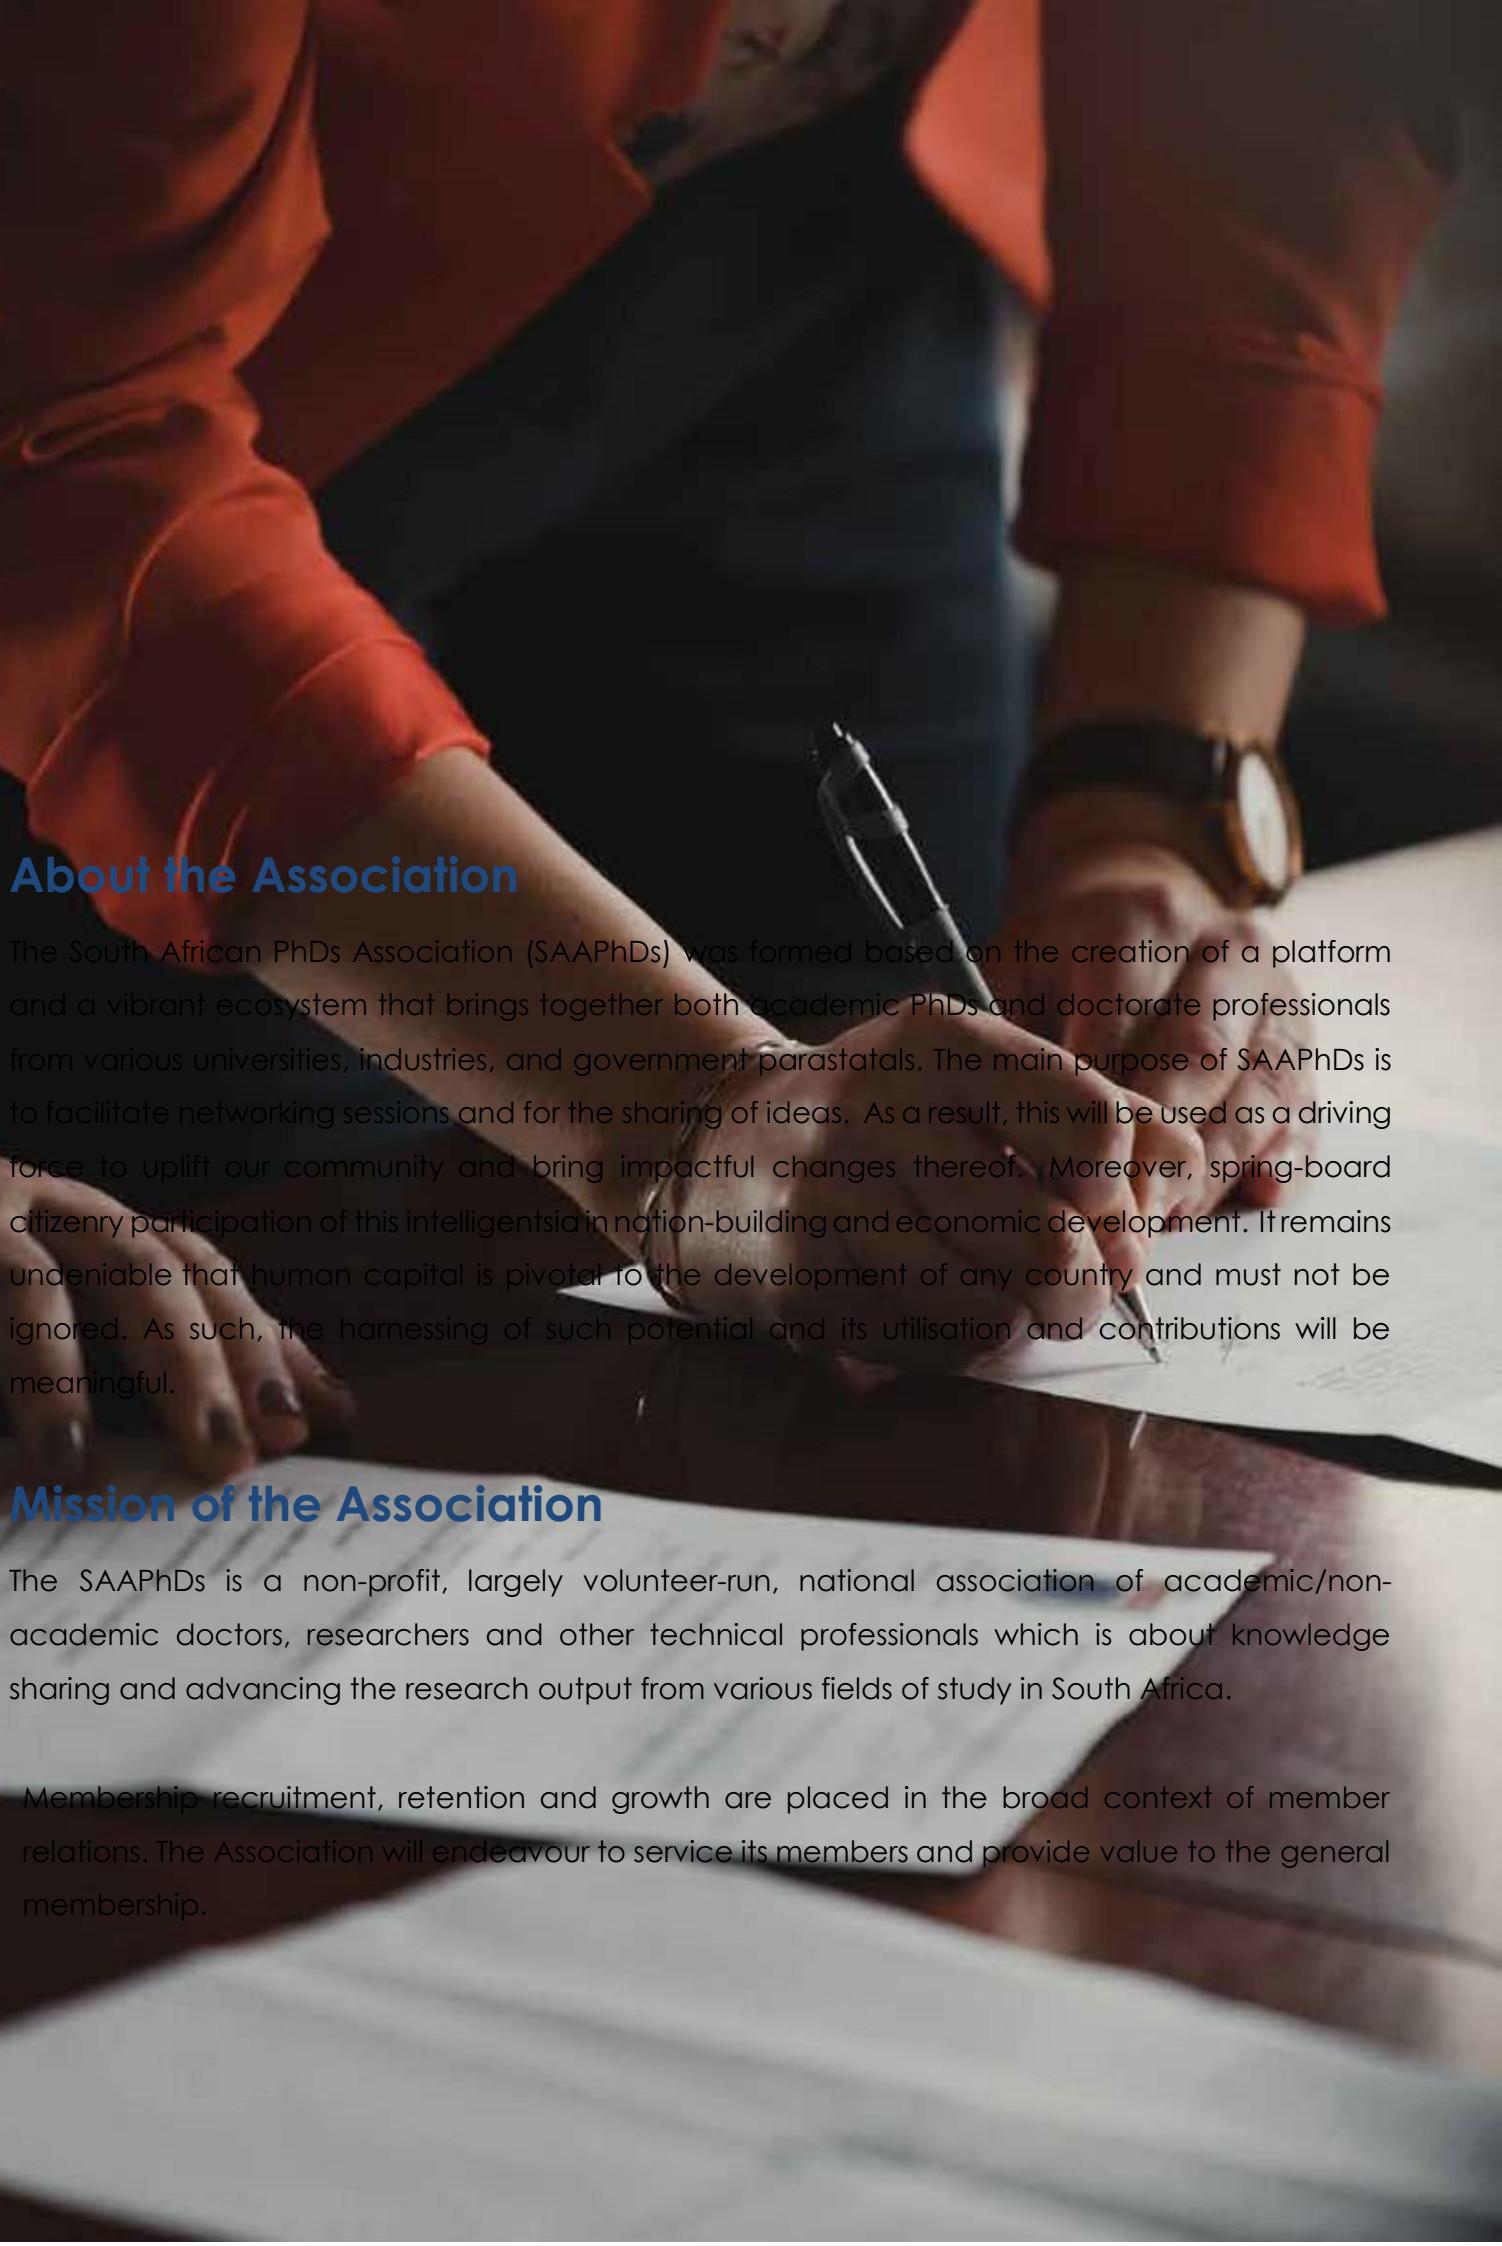

Dr Bongani Nkala

Secretary General of the South African Association of PhDs

SOUTH AFRICAN ASSOCIATION OF PHDs

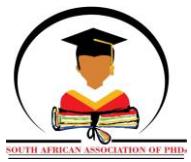

About the Association

The South African PhDs Association (SAAPhDs) was formed based on the creation of a platform and a vibrant ecosystem that brings together both academic PhDs and doctorate professionals from various universities, industries, and government parastatals. The main purpose of SAAPhDs is to facilitate networking sessions and for the sharing of ideas. As a result, this will be used as a driving force to uplift our community and bring impactful changes thereof. Moreover, spring-board citizenry participation of this intelligentsia in nation-building and economic development. It remains undeniable that human capital is pivotal to the development of any country and must not be ignored. As such, the harnessing of such potential and its utilisation and contributions will be meaningful.

Mission of the Association

The SAAPhDs is a non-profit, largely volunteer-run, national association of academic/non-academic doctors, researchers and other technical professionals which is about knowledge sharing and advancing the research output from various fields of study in South Africa.

Membership recruitment, retention and growth are placed in the broad context of member relations. The Association will endeavour to service its members and provide value to the general membership.

Welcome New Members

We would like to sincerely welcome new members to the South African Association of PhDs. Notwithstanding 2023 renewals, the proudly welcomed over 50 new members during the course of 2023. We are excited to have new members on board and we look forward to the engagement and interactions through our varied events and conferences. We are always in search of opportunities for members to develop new skills and knowledge, to expand their professional networks, and to grow their personal brands. Through our SAAPhDs events and conferences, we encourage active participation, and we would appreciate your hosting or speaking at one of these events. Our events provide a platform and opportunity for members to share knowledge and experiences with a broad and diverse community of intellectuals and leaders.

Membership Renewal 2024

In 2023 SAAPhDs have achieved more than 150 memberships of Doctor of Philosophy and Professors included. These memberships are paid annually and approved by the Executive Committee (Exco) based on the validated qualifications. The annual membership fees are payable by members when joining the Association. While we are continuously exploring new service offerings to the market, membership income remains our main source of revenue and critical to our financial sustainability.

Full Membership Fees: R1150

Student Membership Fees: R172

Benefits of Membership

A SAAPhD membership provides access into the country's network organisation for empowering individuals with a PhD and those aspiring for a doctoral degree to succeed in any industry. Unlock your potential with the South African Association of PhDs membership. By joining the Association and you become part of an intellectual community and gain access to knowledge, education, credentials and exclusive opportunities for members. When you are a member, you become part of a community of professionals and academics with doctoral degrees that offers a platform to educate, inspire, and innovate. We are a community of change makers and want to make an impact in our society. We urged all our members and those with PhDs to please

SOUTH AFRICAN ASSOCIATION OF PHDs

renew their membership for 2024 to continue enjoying the benefits of being part of the Association.

Why become a member of the South African Association of PhDs?

Recognition
Each member receives a yearly SAAPhDs Membership Certificate

Influence
Lobbying to the government and various authorities on behalf of members, academics and other researchers to influence public policy.

Proudly South African

Exclusive Savings
Benefit from discounted attendance fees for the annual SAAPhDs Conference and other events

Connect and network
The opportunity to network and engage with other members on issues of shared interest through information sharing

Mentorship
SAAPhDs, members are part of the most progressive body for PhD holders in South Africa

Change Makers
Members are able to contribute towards, and gainfully participate in, a host of educational and promotional activities aimed at continuously elevating and empowering PhD holders in South Africa

Choice
Voting rights and may stand for election as office bearers

Professional Development
Information sharing through training workshops, Seminars and Position papers

Our Events and Activities

The South African Association of PhDs Launch Conference

Our heartfelt thanks for making the South African Association of PhDs launch were great success on 03 October 2023. The consensus decisions taken at the launch have put the Association on firm ground heading into 2024. The SAAPhDs has elected its new executive committee based on the hybrid event which was venue-focused in Pretoria at Woodhill Estates with the theme of "building the nation". Different keynote speakers were hosted for the launch event which has been a success.

We would like to give special thanks to our sponsors for the event:

SOUTH AFRICAN ASSOCIATION OF PHDS

SAAPhDs Annual Report 2023

Webinars of the Association

The South African Association of PhDs hosted a series of webinars addressing current and important issues in the space of academia, including mental health, the landscape of the Postdoctoral Research Fellows in South Africa among others.

The webinar was aimed at creating public awareness to make issues related to mental health a priority in South Africa. The coronavirus disease 2019 (Covid-19) epidemic impacted greatly on the mental health of many people and its impacts will still go on for many years to come. Hence, there was a need for a such webinar to deliver on mental health awareness, its factors and support that can be solicited for those in need. On the 7th of April, the entrepreneur webinar focusing on the key success factors for establishing, managing and operations of an NPO or enterprises. The webinar panelists included Mr Mthokozi Bhengu and Mr Luvuyo Rani.

On the 01st of June the Association delivered a webinar focusing on the landscape of the Postdoctoral Research Fellows in South Africa with special focus on the challenges, enablers, and lessons learned. The webinar fostered conversation around the current policies on Postdoctoral Research Fellowships – facilitators & limitation; roles of PDRFs, mapping career path of PDRFs, turn-over of PDRFs Remuneration and privileges, life post PhD as a PDRF. The webinar was delivered by Dr Palesa Natasha Mothapo and Dr Philippa Kerr.

Media and Publicity

On the 6th of June 2023 he represented the Association at the International Human Rights Network hosted by ASSAf - the theme was: The role of national academies and universities in promoting human rights and enhancing equality. More than 23 Nations from Asia, Europe, America and Africa were represented.

Applying scientific thinking
in the service of society

20 March, 2023

Dr Esewu Mxolisi Mathebula
South African Association of PhDs

Dear Dr Mathebula

Re: Invitation to speak at the 2023 International Human Rights Network Meeting

The Academy of Science of South Africa (ASSAf) and the International Human Rights Network of Academies and Scholarly Societies (IHRN) will jointly host the 14th Biennial Meeting from the 6 to 8 June 2023 in Pretoria, South Africa at Menlyn Main hotel. The IHRN is composed of science academies and scholarly societies from approximately 80 countries and works to address shared science and human rights concerns. The upcoming public symposium in Pretoria will focus on the role that the scientific, health and engineering communities can play in promoting human rights and enhancing equality, particularly through national academies and universities.

On behalf of ASSAf and IHRN, I would like to hereby extend an invitation to you to participate in the symposium. Your research interests in policing, crime prevention, and leadership will make a positive contribution to the discussions and impact of the symposium. In particular, we would be grateful if you could speak at the Early Career Scholars session on 6 June 2023. The theme of the meeting is ***The Role of National Academies and Universities in Promoting Human Rights and Enhancing Equality.***

I would appreciate it if you can respond to this invitation by 27 March 2023 to Ms Rajeshree Mahabeer at Raj@ASSAf.org.za

Yours sincerely,

A handwritten signature in black ink, appearing to read 'Prof Himla Soodyall'.

Prof Himla Soodyall
Executive Officer, Academy of Science of South Africa

Dr Mathebula on the far right representing the SAAPhDs at the International Human Rights Network hosted by ASSAf.

Media and Publicity

Dr Mathebula has been in radio and TV interviews representing the Association.

- Ligwalgwala FM - Crime / Policing Analysts (almost every week)
- Power FM - the state of the defense force (cannot remember the date)
- SABC + TV News looking at the Quarterly Crime statistics - around May 2023.
- eNCA - Occult (after two young boys were killed in Soweto) 27 April 2023.
- uKhozi Fm on several times.

The Association was invited once again by eNCA as to weigh in on the killings of leadership in the higher institutions. The Association was represented by Secretary General Dr Nkala. The interview was held on the 10th of January 2023 and the main focus for the conversation was triggered by an attempt to assassinate Prof Sakhela Buhlungu, VC for UFH. Dr Nkala condemned the killings which is not part of nation building.

SOUTH AFRICAN ASSOCIATION OF PhDs

Media and Publicity

The Association was invited by Daily Thetha on SABC 1 to participate in a conservation about hoary doctorate and bogus qualifications. This was triggered by various institutions in 2021 that bestowed honorary doctorate to individuals which don't quality for this. Furthermore, the Institutions that were handing out these honorary doctorates didn't have legal or legislative mandate to do. The Association was represented by Secretary General Dr Nkala who played a pivotal role in educating our society about importance of honorary doctorate and bogus qualifications or institutions.

Social Media Coverage and Engagements

The South African Association of PhDs is more active across social media channels, this includes Twitter/X, Facebook, LinkedIn, and Instagram. In recent months, we our office marketing coordinator who has been assisting us in delivering regular and timely content to members across all social media channels. During 2024, we will continue our social media success by implementing actions to bring a targeted, creative, authentic, and practical digital marketing strategy into fruition.

We encourage members to follow us and join in the discussions:

The South African Association of PhDs would like to congratulate Prof Dire Tladi from the University of Pretoria who has been elected to a 9-year term on the International Court of Justice in the Hague. He is the first South African to serve as a judge on the Court.

Congratulations and well done on this achievement!

Dear South African Media Houses
The assassination attempt and murder of a security executive at the University of Fort Hare

January 8th, 2023

The South African Association of PhDs (SAAPhDs) condemns all forms of attempts or assassination of academic leadership. This has been observed more especially in black institutions where a fraction of individuals disagree on how tendering process is run or if it doesn't favour those individuals who need to take care of executive leadership.

If had been observed in this country and not only by Vice-Chancellor (VC), but the executive members as well. It was reported early this year that an executive security member of VC of the University of Fort Hare was murdered to assassinate the VC. We extend our heartfelt condolence to the family of Mr Vesselle.

Such killings are not good for the university communities and temper with progress. We call on the NQF level 10 to rally behind the executive and play a pivotal role in protecting the dignity of the institution. Moreover, to ensure that leadership who brings change are being supported and made safe.

Kind regards,

Dr B A Nkala
Acting General Secretary of SAAPhDs

Treasurer's Letter and Report

December 2023

Dear Members and Colleagues,

The South African Association of PhDs (SAAPhDs) is thankful to show the Annual Financial Report for the period ended 31 October 2023. Despite the challenges many challenges, today we are hosting our SAAPhDs Launch Event in-person to congregate and give meaning to our association. This event was well attended by our members.

We wish to thank each member and every member who contributed funds to this event to make it success. As the Treasurer-General of this Association, I am pleased to report that we didn't incur any losses when we hosted this event. This speaks to the commitment of our general

membership to this Association and the Interim Executive Committee who organised this event.

The level of professionalism of our financial planning and budgetary team to manage and control costs to ensure that we are prudent in our spending and the usage of funds to host member events, is worth commending.

A key challenge that we have as an Association is attracting donor funds and sponsors for our events. We managed to attract at least two sponsors namely MSS Group and Living Word Residence. It will be vital in future that we attract more sponsors and donors for our events and for the Association.

It is worth noting that the accounting books would not balance and show a positive surplus if it was not because our volunteers in the Executive Committee who donate their time and expertise at no compensation.

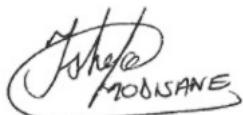

Membership Fees

While we are continuously exploring new service offerings to the market, membership income remains our main source of revenue and critical to our financial sustainability. We offer a unique member value proposition. The SAAPhDs membership service offering is attractive in the market in that member fees provide you with many member benefits. While our costs of providing services to members are increasing, our membership fee is still relatively low while we try to service the operating costs of the Association. It is important that all members pay for their members fees to ensure the long sustainability of the Association and to ensure that we achieve our mission, vision and strategy.

I wish to thank you as our members for the continued support to the Association as we grow in leaps and bounds.

In the interest of transparency and leadership accountability, I have attached below the Annual Financial Statements Report for the period ended 31 October 2023.

Sincerely,

Prof. Cameron Modisane

Treasurer-General of South African Association of PhDs

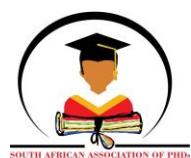

SOUTH AFRICAN ASSOCIATION OF PhDs

Our Operations

GRFW

The SAAPhDs Office

The South African Association of PhDs office is the running engine of the Association; and is overseen by the Secretary General and the Treasurer General who are accountable for the office, finances, and general administration. The office supports all directors and volunteers in the effective discharge of their portfolio strategy and initiatives; and day to day running of the Association. Due to the voluntary nature of the directors and volunteers, the office plays a critical role in ensuring the sustainability and effectiveness of the Association as a going concern. The office is also the primary point of contact for membership support and engagement.

We appreciate our office administrator, Simphiwe Yende for his dedication, patience, passion, and hard work in running the office of the Association.
